# Testing React Components

Jest intro

Jest is a testing javascript framework, it help us to validate expected result:

```javascript
function sum(a, b) {
  return a + b;
}
module.exports = sum;
```

```javascript
const sum = require('./sum');

test('adds 1 + 2 to equal 3', () => {
  expect(sum(1, 2)).toBe(3);
});
```
